**KAAP is a non-profit, private organization. We are dedicated to providing support to families in crisis and to preserve family unity free from violence. Our community based program is dependent on grants and community support. Last year we added a new program to our services which enables us to provide services to victims and families of sexual assault and victim crimes.**

**Last year KAAP celebrated their 30<sup>th</sup> year of providing services for victims in Mohave County. Our newly acquired program is a community based child and family advocacy center offering services to sexual assault and crime victims. We've had such positive feedback to our involvement and commitment to this program and hope funds will be available for its continued success.**

**Attached is a "Letter of Introduction" to outline the services we provide including the need and demand for those services in our community.**
